PROFESSIONAL SUMMARY

Detail-oriented professional with experience in inventory control, warehouse operations, physical inventory auditing, accounting reconciliation, data analysis, and operational reporting. Experienced in managing ERP inventory transactions, reconciling physical and system records, analyzing sales and inventory variances, and preparing daily inventory and accounting reports. Skilled in SAP, Odoo ERP, Microsoft Excel, Google Sheets, and Google Apps Script, with a strong focus on data accuracy, reconciliation, process improvement, and operational efficiency.

CORE COMPETENCIES

SAP and Odoo ERP, Inventory Control, Warehouse Operations, Inventory Auditing, Inventory Reconciliation, Accounting Reconciliation, Variance Analysis, Data Analysis, Operational Reporting, Data Validation, Warehouse Transfers, Stock Monitoring, Process Improvement

PROFESSIONAL EXPERIENCE

SAP Operator | Inventory Controller | Inventory Auditor | Accounting & Data Analyst

July 2025 - Present

Atlantic Bakery

- Manage SAP and Odoo ERP inventory transactions, including transfers, production issues, receipts, pull-outs, and inventory adjustments across multiple warehouse locations.
- Conduct physical inventory counts across warehouse locations and reconcile physical quantities with ERP records to identify overages, shortages, and discrepancies.
- Validate inventory data for products, ensuring consistency between physical counts, warehouse transactions, supporting documents, and system records.
- Monitor production and warehouse inventory movements involving raw materials, production stocks, finished goods, and transfers.
- Prepare inventory audit, reconciliation, and variance reports to support management review and operational decision-making.
- Reduced daily reconciliation time by automating reports with Google Apps Script, enabling faster cash-flow analysis for management.
- Analyze production, inventory, deliveries, transfers, rejects, purchase orders, accounts receivable, and ending balances as part of daily reconciliation.
- Use Microsoft Excel and Google Sheets to analyze operational, inventory, and accounting data and develop tracking and reporting tools.
- Use Google Apps Script to automate spreadsheet processes, improve data validation, and reduce repetitive work.
- Coordinate with warehouse, production, and accounting teams to investigate discrepancies, validate transactions, and ensure accurate and timely reporting.

Technical Support / Encoder / Data Gathering Intern

January 2025 - April 2025

Department of Agrarian Reform Camarines Sur II

Naga City, Philippines

- Provided technical support for computer hardware, software, troubleshooting, maintenance, and equipment setup.
- Encoded, maintained, and validated operational data and supporting documents for reporting and administrative requirements.

TECHNICAL SKILLS

ERP and inventory systems	SAP, Odoo ERP, Inventory transactions, Stock movement monitoring, Inventory adjustments, Warehouse transfers
Data and reporting	Microsoft Excel, Google Sheets, Google Apps Script, Data validation, Data reconciliation, Data analysis, Variance analysis, Inventory reporting, Accounting reconciliation
Excel and Google Sheets	Pivot Tables, XLOOKUP, VLOOKUP, SUMIFS, COUNTIFS, INDEX/MATCH, FILTER, Conditional Formatting, Data Validation, Spreadsheet automation
Inventory and warehouse operations	Inventory control, Physical inventory auditing, Warehouse reconciliation, Stock monitoring, Transfer in/out, Production inventory, Inventory variance investigation

EDUCATION

Bachelor of Science in Information Technology

2021 - 2025

Partido State University
College of Engineering and Computational Science
San Bautista St., Goa, Camarines Sur

SELECTED TECHNICAL PROJECTS

Digital Wedding Invitations

Websites

Tools: Next.js, React, CSS, Responsive design

Responsive wedding invitation websites designed around each couple's story. These projects bring the important event details together in one accessible, personal online experience.

Odoo Operations Control & Reconciliation

Google Sheets Automation

Tools: Google Sheets, Google Apps Script, Advanced Formulas, Dashboard Development, Data Reconciliation, Data Visualization, Workflow Automation

Developed a structured Google Sheets control panel that brings source records, output totals, reconciliation results, process distribution, sales comparisons, and exception rules into a clear operational reporting view.

Wedding Website Monitoring System V2

Google Sheets Automation

Tools: Google Sheets, Google Apps Script, Google Forms, Advanced Formulas, Dashboard Development, Data Management

Developed a Google Sheets monitoring system that combines project status, checklist progress, client intake, form responses, and payment information. Its dashboard summarizes live websites, revision work, and overdue tasks while keeping detailed records available in dedicated sheets.
